

We introduce ourselves, we are

AMSO CONSULTING

HISTORY

30 years of experience

Since 1994, we have been providing companies with solutions that generate efficiency, automation, time savings and a positive and demonstrable Return on Investment (ROI).

+ 300 projects

We have automated and optimized processes in several areas, such as Budget Management, Cash-Flow Management, Business Intelligence, Budget Preparation and Financial Reporting.

Solutions that work

We choose them ourselves, always with functional and technical criteria, never for marketing reasons..

95% Satisfaction

Our clients have rated us, and satisfaction has been above 95%. We maintain long-term relationships with clients who have trusted us for more than 15 years.

TEAM

Jean Marc Soulié

With nearly 40 years of experience as a Treasurer, CFO, CEO (AMSO Consulting), and Financial and Technology Consultant, I hold a Bachelor's degree in Economics and Business Administration, specializing in Finance and Sales/Marketing from CNAM, a postgraduate degree in Applied Economics, and a Master's degree in Banking and Financial Engineering from Toulouse Business School. I have extensive experience, with over 300 projects, in software implementation and systems integration. I am self-taught in SQL, VBA, Java, Power Query (M language), and other languages. I have broad experience in data integration. A specialist in Cash Management, Credit Management, and Expense Reporting, I have been a pioneer/visionary in Business Intelligence and CPM/F&PA. I speak four languages.

Alejandro Serra

I have 26 years of experience, the first 13 as a Financial Controller and the following 13 as Finance Director for various companies, both national and multinational. I hold a degree in Economics, specializing in Finance, a Master's in Financial Management from CEF, and an MBA from EAE, in addition to numerous postgraduate qualifications. I speak six languages, and, in recent years, I have become very interested in technology, being an expert in Excel and possessing knowledge of SQL, DAX, VBA, Python, Power Query, Power Pivot, Power BI, and Artificial Intelligence. I used Mercur for one year at Hoteles Único, where I met Jean Marc.

CONCEPT

SMART DATA CONCEPT

“DATA IN THE RIGHT TIME”, Reports must be quick and immediate, reliable, and available to everyone..

Data is not only for creating reports and analyses, but also for developing new ones

BUDGETS AND FORECASTS, ALLOCATIONS, ADJUSTMENTS, etc., such as to **MAINTAIN AND UPDATE THE DATA** vs ORGANIZATION & ENVIRONMENT.

OBJECTIVE

1- SMART DATA

The aim is to provide companies and their leaders with important data reliably and quickly when needed, so that it becomes valid and useful information for decision-making, but also data available at any future time..

2- SOLUTION

For any company, sector, etc., respecting their capabilities and limitations, we contribute our methodology and the necessary processes to be able to commit to and optimize them according to each case, always implementing the appropriate solution.

3- TECHNOLOGY

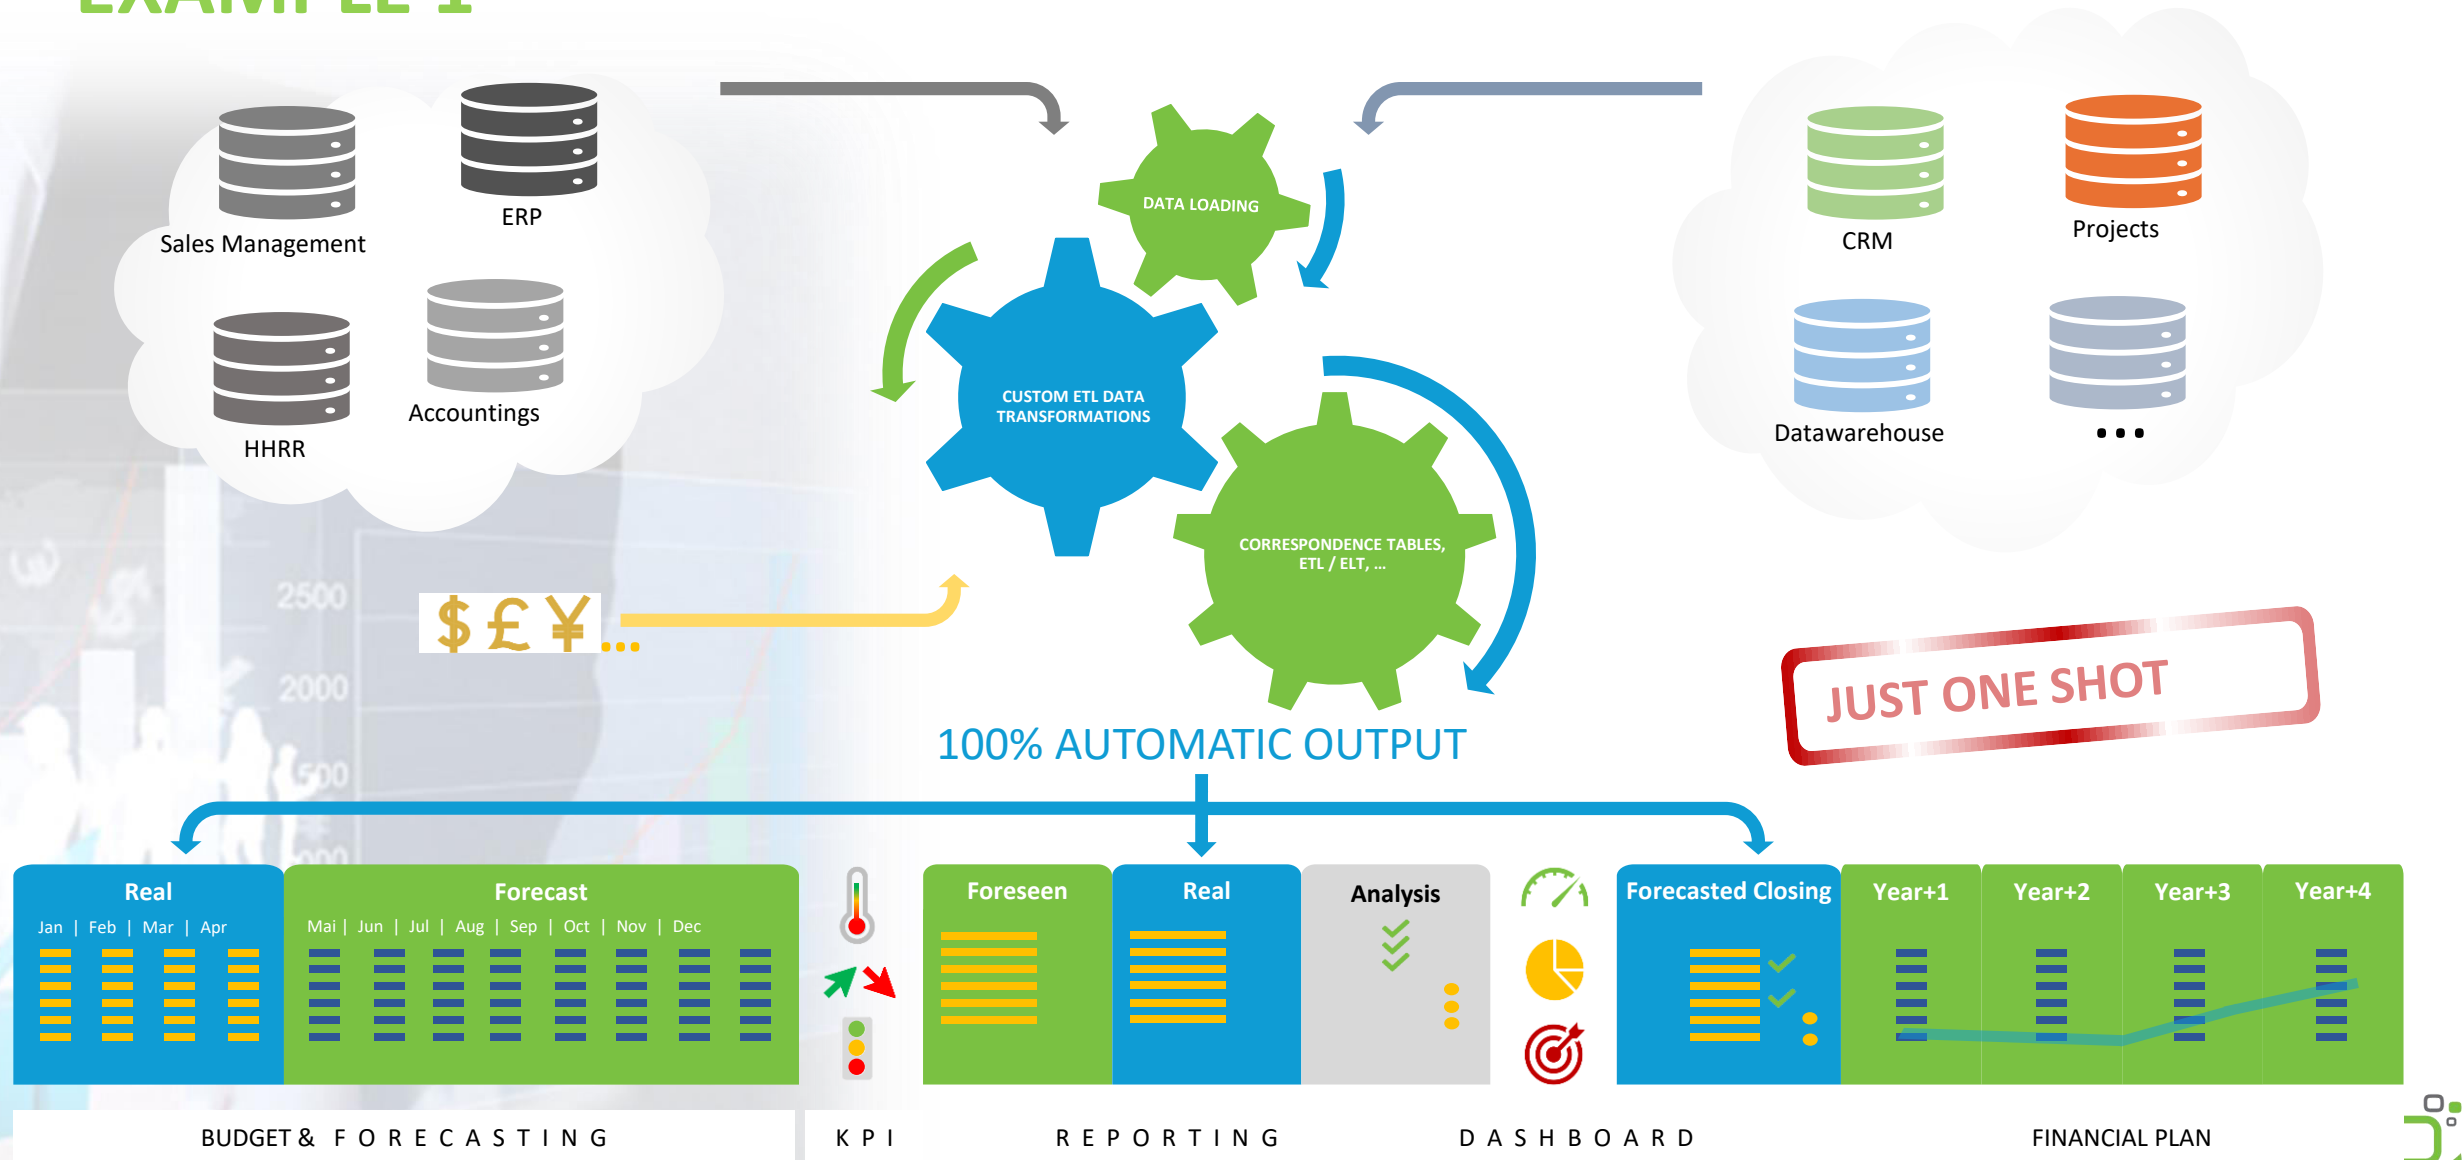

We recommend the technologies and tools we have validated, incorporating both training and ongoing support into the proposed solution, which allows us to commit to the result; technology is only a means, but it is essential..

4- SERVICES

Our services go beyond simply implementing a methodology and technology; we also support our clients in the proper use and monitoring of processes, providing specific advice.

TECHNOLOGY

EXPERTISE

Divided into 2 areas::

- The configuration and customization of applications
- The technological and data-integration side between systems, where we specialize in SQL, DAX, MDX, Java, JSON, etc.

SOFTWARE

We propose very advanced configurations in spreadsheets such as Excel and in Power BI, as well as in more specialized solutions such as Mercur Business Control & Eagle ACT..
